About us

Company Profile

Ma King Kee had been established since 1950.

We have lot of years reprographic services experience. We provide high quality products and prompt delivery for our customers. Now we have 10 branches and over 100 employees in both Hong Kong and Macau office.

Our services for customers have always concern and attention. We believed customers benefit should be more important. And it is also the only way to guarantee ourselves to continue to provide high quality standard to our customers.

馬景記
Ma King Kee

Our Service

Our services includes Wide Format Photocopying, Computer Document Output, Digital Printing, Wide Digital Scanning, Wide Format Color Output and Microfilm Scanning.

We always well prepare and accept changes. Keep ourselves in line with the market needs and adjust our direction based on customers' future requirements and developments.

Our people are passionate about what they do and also passionate about the service they provide to our customers. Each individual contributes to our overall success and we encourage personal responsibility, commitment and cooperation – for the benefit of our company and our customers.

馬景記 Ma King Kee

馬景記
Ma King Kee

Internal Service

In oversize format segment, HP Color System and Canon are our major partner in wide format B&W and Color area. Started from their worldwide flagship products.

In small format segment, our partnership with various suppliers such as Fujifilm, Canon and HP.

They provide wide range of services, from normal B&W and Color copying service, output professional reports, tenders and up to wide format color output display.

External Service

The purpose of multi-branches setup is to provide guarantee service to the customer. Branches will backup each other, as well as customers can choose their most convenience branch for servicing, such as plotting, photocopying, document binding and outputs. Those services can be done on time with no critical delays.

We have two cargo delivery service daily for the building site, airport and country side.

And also we have about 30 employees for courier team, to pick up and delivery the plans.

Network

We have our own website (www.makingkee.com) with upload function, user can easily upload their files by using web browser.

We also have 7x24hrs FTP Server (ftp.makingkee.com) provide customer to upload file. It enabling the transfer of data throughout the Internet over a secure connection. FTP is the simplest, fastest and most limits-free way for users to sending files to us. To make use of its power, users need to have a client-side FTP program (such as FileZilla Client) installed.

However, a Upload Server was set for user's demand. It is the third ways for uploading files to us.

Scanning workflow

Scanning Workflow Diagram

Black and white

The paper original is fed into the scanner and scanned line per line.

Each scanned image line is converted on a scale of 0-255.

This generates the 256 grey scale image

(image data in 8-bit form, representing 256 grey scales per pixel)

Color

The Original is fed into the scanner and scanned

line by line. Each pixel is converted on a scale of 0 to 255 for red, for green and for blue.

This generates a 24-bit RGB image

(256 levels per color requires 8 bit per color)

About **FUJIFILM**
Value from Innovation

Revoria Press PC1120

- Superior productivity with high-speed printing of **120 ppm** even when printing in 6 colours.
- High-definition expression with high-output resolution at **2400 x 2400 dpi**.
- High-performance print server that maximizes print engine productivity.
- Supports a broad range of stocks: 52 gsm lightweight paper, **400 gsm** heavyweight paper, minimum 98 x 148 mm and up to **330 x 1200 mm**.
- Various feeding and finishing options to streamline workflow from print to post-press
- **1 pass 6-colour** print engine
- In addition to CMYK toner, the press can load a maximum of two specialty toner stations.
- For specialty toner, choices of *Clear, Gold, Silver, White, Pink and Custom Red**1*2 toners are available.
- By overlaying CMYK on Silver or Gold, you can print various brilliant metallic colours.
- The rich colour expressions created by the 6-colour print engine can expand your business.

Revoria Press PC1120

6-colour print engine brings unrivaled expressive power to digital

馬景記
Ma King Kee

About **FUJIFILM**
Value from Innovation

Iridesse™ Production Press

- **One-pass 6-colour** print engine enabling rich color expressions that could not previously be achieved with digital printers.
- Underlay with **specialty dry ink** realises offset-like metallic colours.
- *Gold, Silver, White, Clear and new Pink* dry inks, bring new possibilities of design expression.
- High printing resolution that realises high-definition images.
- Fine expression of texts, thin lines, and gradations with the **1200 x 1200-dpi x 10-bit rip rendering**.
- Industry-leading flexibility with the support for lightweight and heavyweight stocks from 52-400gsm.
- Supporting a variety of paper sizes including postcards and banners.

Mixture of **pink dry ink** with CMYK colors will enable printing *orange, red, violet and other colors* with a vibrancy that cannot be achieved with CMYK colors alone.

KIP Scanner

KIP 2300 CCD SCANNING SYSTEM

- The new KIP 2300 high productivity scanner sets a uniquely high standard for speed, quality and flexibility in a digital image capture system.
- Outstanding image quality is delivered through the innovative use of bright white LED light sources for illumination and 600 x 600 dpi image capture resolution.
- The KIP 2300 is a high speed scan solution that provides world-class workflow flexibility through its ability to scan face up or face down and scan thick mounted originals and loose sheets of paper from a single unit.
- The KIP 2300 scanner is powerful, with image capture speeds from 5 ips to 12 ips in monochrome (dependent on dpi) and 2 to 6 ips in color. The image capture area is up to 36 in. wide, yet originals up to 42 in. wide may be fed through the scanner.

About Hewlett Packard

HP HD Pro 42-in Scanner

Accurately reproducing artwork, maps, technical drawings, and photos in color and black-and-white, and building an efficient print-scan-copy solution.

- Reproduce everything from technical documents to graphics—even damaged originals—with CCD scanning technology.
- Create large-format color and monochrome scans up to **42-inches** (1067-mm) wide
- Produce incredibly accurate and high-quality scans with 1200 dpi optical resolution.
- Easily share and collaborate—scan to HP SmartStream software, email, USB, network folders, and HDDs.
- Speed up to 15 cm/sec (color, 200 dpi); up to 33 cm/sec (grayscale, 200 dpi)
- Can scan media thickness 15mm
- Support format PDF, TIFF, JPEG, JPEG2000, DWF, CALS (B&W); multi-page PDF generation

es-te

estefold 4210

The high performance offline Folding System

estefold 4210 shows its full strength when plans from different printers have to be folded quickly.

Time consuming fold work is done with outstanding precision and speed.

The finished fold packages are automatically deployed face up on the conveyor belt where they can be obtained in an ergonomic height.

Only a few minutes practice are sufficient to utilize its full potential.

- The fold speed is 19 m/min
- The fold tolerance is ≤ 1 mm
- The max. input format is 930 mm wide and 6.000 mm long

estefold 4210 is perfectly suited for medium volumes from different printers.

estefold 4210

High Performance Offline Folding

About Epson **EPSON**
EXCEED YOUR VISION

Epson Perfection V800 Photo

- The Dual Lens System is capable of resolutions up to 6400 dpi (Film scanning using the film holder) with an Optical Density of 4.0 Dmax for film scanning and 4800 dpi for reflective scanning
- Automatically remove dust and scratches — Digital ICE Technologies remove many surface defects from film and prints to minimize costly retouching
- ReadyScan® LED light source — for fast scans with no warmup time required
- Equipped with film holders for 35mm strip film or mounted film, 6 x 20cm medium format film, 4" x 5" large format film and a film area guide for scanning up to 8" x 10" transparency, experience versatility and ease in your scans
- Backlight Correction helps to reduce interference from background light by correcting shadows, creating a clearer and sharper image.
- Use energy-saving and eco-friendly ReadyScan LED light sources to achieve zero warm-up time, providing hyper-responsive scanning
